CO₂ Footprint – How sustainable are you?

Are you familiar with these challenges?

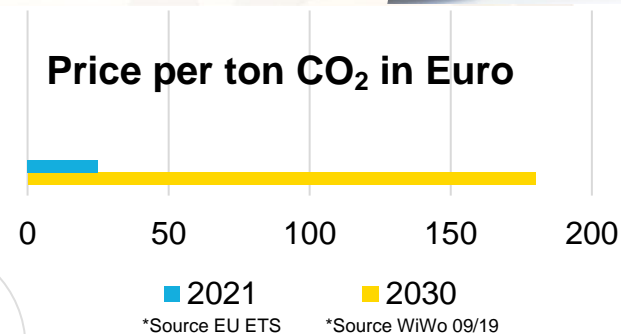

- The importance of sustainability is constantly raising for your customers
- Currently, there is no transparency on the amount of reduced CO₂ equivalents in your company
- In this century, the CO₂ footprint is an important key figure for you as a manager – also because of the increasing political pressure
- Fleet consumption and production are in the foreground; however there has not been any circular or sustainable solutions such as reman quantified

Our solution

We calculate the reduced amount of CO₂ equivalents via, e.g. Reman and 1-1 Repair – Aftersales solutions. In case you have not implemented any CO₂ reducing solutions, we help you by defining your portfolio and development of sustainable product lines.

ENCORY
AFTERSALES
SOLUTIONS.
SMART.

Price per ton CO₂ in Euro

“Climate protection turned into a business case in automobile industry.”

(Wirtschaftswoche 01/2021)

What distinguishes Encory from others

Encory develop and operate end-to-end circular solutions for aftersales. From the implementation of sustainable remanufacturing projects to entirely taking over the reverse supply chain to the purchase of obsolete products and secure recycling – we create and manage closed loops. As an innovative and experienced partner and solutions provider, we have acquired a high level of process and system know how to handle complex requirements from our customers and partners.

Our approach:

Analysis

Conception

Calculation

Up to
2
tons of CO₂

ideal amount of
consumption per person
per year

More than
11
Tons of CO₂

consumption in
Germany per person
per year

“Knowing your CO₂ footprint helps you set goals on reduction and implement the necessary measures.”
